

Filter set for DJI Mini 3 / Mini 3 Pro Neewer FL24 VND 2-5 S

Ref: 6976831830809

Filter set for DJI Mini 3 / Mini 3 Pro Neewer FL24 VND 2-5 STOP&6-9 STOP/UV/CP.

Filter set for DJI Mini 3 / Mini 3 Pro Neewer FL24 VND 2-5 STOP&6-9 STOP/UV/CP.

The Neewer FL24 VND filter set is designed specifically for users of DJI Mini 3 and Mini 3 Pro drones. The filters are precision CNC-machined to ensure a perfect fit to the drone's lens without disturbing the calibration or balance of the device. Thanks to the use of a lightweight aluminum alloy used in aviation, the filters weigh only 3.2 grams, which is key to maintaining optimal flight performance.

Advanced filtering capabilities

The kit includes two types of ND (Neutral Density) filters to accommodate a variety of lighting conditions. The ND2-32 filter is ideal for moderate light, allowing longer shutter speeds and wider apertures for smoother tonal transitions. For more intense light, the ND64-512 filter reduces the amount of light from 6 to 9 stops, allowing you to create effects such as motion blur of waterfalls or busy streets without the risk of overexposure.

Optimize image quality with CPL and UV filters

The CPL (Circular Polarizer) filter significantly improves the quality of photos taken on sunny days by darkening the sky and reducing glare from non-metallic surfaces, resulting in increased color saturation and contrast. The UV filter, on the other hand, blocks ultraviolet radiation, eliminating unwanted coloration in images and increasing clarity.

High optical quality and protection

The filters are made of HD multi-layer optical glass on both sides, which is resistant to water, scratches and grease. This solution ensures long-lasting optical quality, even in harsh conditions. The ultra-thin aluminum frame not only minimizes the risk of affecting flight performance, but also makes it easy to install and remove the filters.

Practical accessories

A compact carrying case and cleaning cloth are included, making it easy to transport, store and maintain the filters, ensuring they are ready for use in any conditions. This filter set is a must-have accessory for any DJI Mini 3 or Mini 3 Pro drone user who wants to raise the quality of their photos and videos to a professional level.

Included

ND2-32 filter ND64-512 filter CPL filter UV filter Carrying case Cleaning cloth

Manufacturer Neewer Model B0BZ3Y5WC7 Filter types ND2-32 / ND64-512 / CPL / UV HD optical glass Yes Filter weight 3,2 g Compatibility DJI Mini 3 / DJI Mini 3 Pro
