Ref: 6976831830816

Clip On filter set for Neewer FL-37 37mm ND2-ND400 phone

Neewer FL-37 37mm ND2-ND400 Clip On filter set for phone

Want to take even better photos with your smartphone? Meet the Neewer FL-337 filter. With the variable ND filter (ND2-ND400) you will gain the ability to fine-tune your exposure. The filter reduces the amount of light entering the lens, allowing you to avoid overexposure in bright conditions, improve color contrast and create a motion blur effect. This is especially useful when photographing dynamic scenes, such as flowing water, traffic, the ocean or changing cloud formations.

Versatile use and compatibility

The Neewer FL-37 filter is designed for easy mounting on various devices. The mounting clip allows quick and stable attachment to smartphones, tablets and even laptops. The filter is compatible with many popular device models, including the iPhone, iPad, Samsung Galaxy Note, Google Pixel, Huawei and others. It can also be used with DSLR cameras that have a 37mm filter thread, making it an extremely versatile tool for photography enthusiasts.

Simple adjustment and robust design

Adjusting the filter to your individual needs is intuitive and convenient. All you have to do is screw the filter onto the clip, attach it to the lens and rotate it to achieve the desired effect. The filter's construction of high-quality optical glass and aluminum frame ensures its durability and resistance to daily use. Non-slip patterns and clear ND2-ND400 markings on the frame allow you to precisely control the

amount of light transmitted.

#### Mobility and ease of transportation

The Neewer FL-37 features an ultra-thin and lightweight design, making the filter easy to carry and perfect for travel. The kit also comes with a practical storage box that protects the filter from damage and allows for immediate use anywhere, anytime.

#### Included
