Kit Neewer RGB1200 LED two lamps 60W 2500-8500K + tripods +   Ref: 6976831838294

Kit Neewer RGB1200 LED two lamps 60W 2500-8500K + tripods + barndoors
Neewer 660 PRO RGB 50W LED lamp

With 60W of power and 480 LEDs, the lamp (with US plug) provides excellent illumination up to 22 000lux@0.5m, with CRI97+ and TLCI98+ ratings. With NEEWER's linear PWM control technology, it exceeds the minimum brightness limitation from 1% slightly bright (brightness and power can reach true 1%) to 100% ultra bright, and a color temperature range of 2500K~8500K and full 360° RGB color range, all for smooth and precise adjustment.

Control with Infinity App & Built-in 2.4G

Use the NEEWER app configured with Infinity connectivity technology to dynamically adjust the settings of multiple lights simultaneously up to 66'/20m and in up to 8 groups, allowing you to control up to 255 devices simultaneously in the app. Works with NEEWER SL90, RGB1, RGB C80 and RGB CB60 lights, which also have built-in 2.4G and 99 channels, set them to the same channel, making every light within 328'/100m a remote control without the need for a network.

18 Scene Modes and Music Sync Support

Updated to 18 scene effects, 17 of them support presets, adding a striking element to your creative videos. The Sync with Music function allows you to synchronize smart lights with music in a colorful, dynamic way based on pitch and volume. Supports Green-Magenta adjustment (GM correction). Constant power without color change or flicker, ideal for high speed shooting at shutter speeds below

Powered By DC Input/NP-F Batteries
Through the DC input, you can plug the lamp into a wall outlet with the included AC power adapter and get continuous power. The lamp also runs on 1 or 2 NP-F750/970 batteries when shooting in the field. Note: Batteries are not included. Supports over-the-air (OTA) firmware updates, allowing updated firmware to be wirelessly transmitted from your phone to the lamp.

AMP Aluminum Case
Constructed of aircraft-grade aluminum, the housing is sturdy and provides excellent heat dissipation. Use the U-shaped bracket to adjust the angle of the light by 360°. The wickets can expand or narrow the light source with 4 flaps, and the matte diffuser helps mitigate glare. The light stands are sturdy and offer a height range from 2.85'-6.6'/87-200cm, and a large carrying bag is included.
