

Lamp LED Neewer GL1 Pro 2900-7000K

Lamp LED Neewer GL1 Pro 2900-7000K

Ref: 6976831830168

Neewer GL1 Pro 2900-7000K LED light panel.

Neewer light panel provides effective and gentle light for your eyes with high color rendering index (97 CRI). What's more, you can adjust its brightness and color temperature, and with 3 available connection methods you can choose the right one for you. Operation of the device is facilitated by a dedicated app, and the quiet operation of the panel will not disturb you while working or playing games.

Convenient operation

From the dedicated app you can control a single light source or several panels simultaneously. What's more, after downloading the NEEWER Live plug-in from the Stream Deck platform, you will customize the panel's operation. Freely adjust brightness, color temperature, on/off lighting, etc.

3 types of connection

You can connect the light panel to your equipment in 3 ways. Use the included 2.4GHz USB dongle, then download the NEEWER Live app. You can also connect to Wi-Fi and conveniently adjust the brightness level or color temperature without interrupting gameplay, or live streaming. Bluetooth is also available, so you can remotely adjust the panel's performance from the NEEWER app.

Even, eye-friendly light

The panel generates light with a maximum intensity of 3700 lux / 0.5 m, which allows you to create shadow-free images. Moreover, it is possible to adjust the brightness from 0% to 100% and the color temperature from 2900 K - 7000 K. In addition, thanks to its well-thought-out design, the panel does not cause flickering or glare, and the color rendering index of 97 CRI is responsible for accurate color reproduction. The light generated by the panel is also pleasant to the eyes - you can use it for a long time without feeling tired.

Refined design

This is not the end of the advantages of the Neewer GL1 Pro. The housing of the panel is made of plastic that dissipates heat well, protecting it from overheating. What's more, the device works quite quietly, so you don't have to worry about being disturbed while working. In addition, the included stand fits desks from 0.9 to 7.5 cm thick. You can also adjust its height from 35-60 cm for more comfortable use.
