TWS QCY AilyBuds Pro+ HT10 Pro headphones, ANC (blue)

Immerse yourself in sound full of detail with the QCY HT10 Pro. QCY wireless headphones deliver crystal-clear Hi-Res Audio-confirmed sound and use the LDAC codec. What's more, they effectively reduce ambient noise - you can make phone calls without worrying about interference. In addition, they support Bluetooth 5.3 and connect to 2 devices simultaneously. Check out what else you can gain.

Lose yourself in the music

The headphones use HiFi 5 DSP technology for perfect sound processing. You can also enjoy deep bass at an optimal level. What's more, their ergonomic design is precisely tailored to your ear canal, guaranteeing an exact fit. In addition, the precise EQ adjustment makes every sound come alive with rich detail.

Even better sound with LDAC codec

Experience sound in its purest form. The headphones support the LDAC codec, which translates into a signal transmission of 990 kbps and a sampling rate of up to 96 kHz / 24 bit. As a result, you can enjoy full-resolution sound and accurately reflected sound in every note.

Crystal clear treble

Feel the difference with the QCY HT10 Pro. The headphones have been repeatedly tuned by acoustic experts, resulting in a wide treble

response and higher resonant frequency. In addition, the size of the headphone has been reduced by 46% - compared to other models, so you can enjoy infinite comfort.

Refined design for user comfort

The headphones are distinguished by a 50° curved design, which allows for comfortable use for long periods of time and stability - you don't have to worry about them falling out of your ears. In addition, each earphone weighs about 4 g, and the ergonomic design does not cause pressure, so you won't even feel you're wearing them.

Perfectly balanced sound

The headphones use noise cancellation technology based on artificial intelligence. Using a dedicated chip, they effectively suppress external noise by adjusting its level individually for each ear. As a result, they effectively balance pressure for greater comfort.

ANC noise reduction

The QCY HT10 Pro offer a total of 6 microphones (3 per earpiece) that accurately capture your voice and effectively block out ambient noise. This allows you to make phone calls in the middle of the urban jungle and be sure that your caller hears you loud and clear. What's more, they automatically eliminate wind noise, so you can walk and run without worrying about interference.

Stable Bluetooth connection

Forget about connection problems. The headphones support Bluetooth version 5.3, which translates into a fast and stable signal of up to 10 meters. In addition, they offer a latency of just 80 ms, for better audio and video synchronization - you can freely play your favorite games and watch movies. It's also possible to pair the headphones with 2 devices at the same time - connect them to your tablet and smartphone, then conveniently switch between them to answer an incoming call or watch a TV series.

Long runtime

Let your music play for as long as possible. The headphones are equipped with heavy-duty batteries and run for up to 4 h (with ANC on) or 5 h (with ANC off) on a single charge. The charging case, on the other hand, extends the operating time to 23 h if you use ANC or 28 h if you turn it off. Listen to your favorite tunes and podcasts without charging interruptions.

Dedicated app

Want to check if you've put your headphones on correctly? With the QCY app, it's possible! Just connect the HT10 Pro to the app and turn on the ANC function. Then put the headphones on - a message will appear in the app, letting you know if the headphones were put on correctly. From it, you can also adjust the sound to your preferences and find lost headphones. Enjoy the conveniences that QCY offers!

Simple, intuitive operation

Operating the headphones will not cause you any problems. Each has touchpads that you can use to skip a song, pause/resume playback, answer an incoming call or enable low delay mode. You can also instantly launch the voice assistant without having to reach for your smartphone.
