

GPS bike computer Cycplus M1 - compatible with Strava, Trai

Ref: 6976297860129

GPS bike computer Cycplus M1 - compatible with Strava, Trainingpeaks etc.

GPS bike computer Cycplus M1

Enjoy convenient access to information during your next trips. The Cycplus M1 bicycle computer is equipped with a clear 2.9-inch LCD screen that displays data such as current speed, temperature, and time. The device supports Bluetooth 5.0 and ANT+ protocol, and its battery life reaches up to 30 hours on a single charge. It is also distinguished by IPX6 water resistance.

A Wealth of Useful Information

The Cycplus M1 bicycle computer provides many useful pieces of information about your ride. You can comfortably check data such as temperature, time, distance, duration of the trip, riding speed, terrain incline, and much more. There is also the possibility of synchronizing data with an app via Bluetooth.

Readable Display

The M1 bicycle computer features a large, 2.9-inch display that ensures comfortable access to the most important information about your ride. It offers a clear, bright image and doesn't glare - even in strong sunlight. It is also characterized by automatic backlighting, which makes it easier to use at night.

Compatibility with ANT+ Protocol

Ensure access to even more information. The M1 bicycle computer is compatible with the ANT+ protocol, so you can easily pair it with many additional sensors - for example, heart rate, speed, or cadence sensors. Have everything under control and conveniently check the data you are interested in!

Easy Mounting

The computer is very easy to mount, and thanks to the carefully thought-out design of the mount, it does not take up too much space on the bicycle handlebar. Therefore, you can easily install additional lights or a sports camera! The device is also characterized by IPX6 water resistance - it is not afraid of rain or accidental splashing.

Long Battery Life

Planning a longer trip? Or perhaps going out for several days and want to take your bike with you? Don't worry that the M1 will discharge too quickly! Thanks to the efficient battery, the device's operating time reaches 30 hours. Forget about the need for frequent recharging!
