Laserpecker 2 Laser Engraving Machine Basic Version

The LaserPecker 2 is a laser engraving machine that combines performance, versatility and mobility. With its advanced technology and intuitive operation, it opens up new possibilities in the field of object personalization. It is ideal for professionals and amateurs wishing to explore the world of laser engraving. It operates at speeds of up to 600 mm/s and provides unmatched precision.

Engrave photos and a variety of materials

The LaserPecker 2 stands out for its ability to engrave photos from an album or camera, allowing users to create unique, personalized works. The device can work on a variety of materials, such as wood, metal, leather or plastic, making it an extremely versatile tool, ideal for a variety of projects. The LaserPecker 2 also stands out for its compatibility with multiple operating systems, such as iOS, Android, macOS and Windows.

Mobility and performance

Despite its small size, the LaserPecker 2 is extremely powerful. Its compact design makes it easy to carry and allows engraving in places that are difficult to reach with other devices. The electric stand is another asset of the engraver. It allows precise adjustment of the focal length using the side buttons, which increases the accuracy and quality of engraving. In addition, the ability to hold the laser at the desired angle allows for optimal adjustment to the engraved surface.

Advanced laser technology

The LaserPecker 2 model is equipped with a NICHIA laser diode and allows engraving at speeds of up to 600 mm/s. Its ability to work at 1K, 1.3K and 2K resolutions enables clear and detailed effects on a wide range of materials. The device has an impressive precision of up to 0.025 mm, which guarantees exceptional quality of final products. This makes the LaserPecker 2 suitable for intricate and precise projects, both at home and in professional applications.

Safe use

The LaserPecker 2 engraving machine will also ensure your safety in use. It is equipped with a protective cover, and offers overheating and tilting protection. You can also lock it with a password. This way you don't have to fear anything! The set also includes special protective goggles.

Impressive longevity

Do not be afraid that the engraving machine will refuse to serve you too quickly. The device is distinguished by a lifespan of about 10,000 hours and can provide an uninterrupted working time of up to 168 hours. This means that you will easily create a lot of fantastic designs with its help!
