

LaserPecker PowerPack Plus Powerbank

LaserPecker PowerPack Plus Powerbank

Ref: 5906168433726

LaserPecker PowerPack Plus powerbank for engravers

The LaserPecker PowerPack Plus powerbank will provide power not only to your laser engraver, but also to other devices such as smartphones, for example. It offers three output ports (DC, USB-A and USB-C) and supports various fast charging standards. It is also distinguished by its 23550 mAh capacity, wide compatibility and handy design, which allows it to be used anywhere without problems.

Wide compatibility

The PowerPack Plus model is compatible with all LaserPecker laser engravers - both LP and LX series. It also works seamlessly with the accessories designed for them. What's more, you will successfully use it to charge your mobile devices, such as smartphones and tablets, for example.

Large capacity

The capacity of the powerbank is as high as 23550 mAh (181 Wh). This means that with its help you can, for example, power your LP4 engraver for about 3.2 hours, the LP3 model for about 6.4 hours, and the LP1 Pro for up to 22 hours! This way you don't have to worry about your device refusing to serve you at the least opportune moment.

Several available ports, fast charging

The Powerbank is equipped with 4 ports - DC input port (12-25V, 6A), USB-C input/output port (maximum power 100W), USB-A output port (maximum power 15W) and DC output port (maximum power 144W). The PowerPack Plus model also supports various fast charging standards, including PD and QC. So you don't have to wait too long for your equipment to be ready to use!

Safe use

At the heart of the powerbank is a high-end battery, which is distinguished by its exceptional durability and lifespan of about 600 charging cycles (after this time the capacity can drop to 80%). The device is also protected against overvoltage, overcurrent, overload, short circuit, overcharging and other hazards. Don't be afraid of damaging it!

Refined in every detail

Another advantage of the powerbank is its handy, compact design - its dimensions are only about 150.5 x 81.6 x 81.6 mm. So you can easily take it with you anywhere or use it in a limited space. The device also has built-in light indicators that will provide you with information about the level of charge of its battery. You can also conveniently switch between the available voltage values - 12 V / 24 V.

Manufacturer LaserPecker Model LP PowerPack Capacity 23550 Mah (181 Wh, 5 V 3 A) Available ports DC, USB-A, USB-C DC input current 12-25 V 6 A USB-C input current 5-15 V 3 A USB-C output current 20 V 5 A max. 100 W USB-A output current 5 V 3 A 15 W DC output current 12 V 10 A 120 W; 24 V 6 A max 144 W; Lifetime Approx. 600 cycles (up to 80% capacity) Dimensions 150.5 x 81.6 x 81.6 mm
