FLYFUN - 30A mini V5

The FLYFUN - 30A mini V5 speed controller from Hobbywing is designed for alternating current (AC) powered aircraft and helicopter models. It features a constant current of 30A and a maximum peak current of 45A, which guarantees a stable and efficient power supply even in demanding conditions. The regulator supports LiXX batteries (2-4 cells) and is equipped with a 5.2V, 3.5A current BEC to efficiently power on-board electronics. Its compact dimensions (37 mm long, 17 mm wide, 5 mm high) and low weight (23 g) allow easy installation in models with limited space. The FLYFUN - 30A mini V5 offers unidirectional control, has a brake function and is programmable, allowing you to customize the operating parameters to meet your specific needs. The lack of sensor inputs further simplifies the design and operation.
