Cooling fan for PS5 Kiwi Home PX07-2 white

The Kiwi Home PX07-2 cooling fan in black is a high-quality accessory designed for PlayStation 5 console users. Featuring a modern design and advanced functionality, this model is an excellent choice for gamers looking for an effective cooling solution for their console. Note: the fan is not compatible with the PS5 SLIM version.

Quiet and efficient operation

The PX07-2 is equipped with three improved turbo fans that guarantee smooth and quiet operation. With a noise level of just 28.8 dB, the unit is virtually inaudible, even during intense gaming, which definitely enhances comfort.

Ease of installation and versatility

One of the main advantages of this model is its ease of installation. The Kiwi Home PX07-2 cooling fan plugs directly into the USB-A 3.0 port of the PS5 console for quick and easy installation. The device can be used in both portrait and landscape orientation. What's more, the fan is equipped with blue LEDs, which not only indicate correct operation, but also give the console a modern look.

Additional features for gamers

The Kiwi Home PX07-2 not only cools the console, but also offers an additional USB port that can be used to charge controllers or connect

other USB devices. This is especially useful for gamers who appreciate the ability to use multiple accessories simultaneously.

Two modes of operation

The cooling fan is equipped with two operating modes: Low with a speed of 3500 +/- 10% RPM and auto, which adjusts to the current needs of the console, reaching speeds of up to 5000 +/- 10% RPM. These options allow you to optimize the fan's performance depending on the intensity of console use, resulting in longer life and better performance.
