Double Eagle remote control RC quad (blue) E383-003

Double Eagle RC remote control quad (blue) E383-003

Enter the world of dynamic and exciting fun with the Double Eagle E383-003 remote-controlled quad. This innovative model opens up new opportunities for play, encouraging activity and developing manual skills. This toy is designed for children eight years old and older.

Advanced capabilities and safety

The unique features of this quad, such as the ability to bounce off the floor, 360° rotation, the ability to climb hills and stand on two wheels, provide countless hours of fun and excitement. The designers also took care of the safety of indoor play - the quad does not scratch furniture, floors and walls, making it an ideal playmate in any home.

Workmanship and technology

Quad E383-003 was designed with durability and safety of use in mind. Soft, crash-resistant sponge wheels minimize the risk of damage to both the vehicle and the environment. Powered by a powerful 3.7V / 1200 mAH battery, the quad provides long-lasting fun, and the included USB cable makes charging easy.

Technological solutions for maximum control

The controller, powered by 1.5 V AA batteries, allows precise control of the quad from a distance, making any adventure easy to master

even for the youngest users. The model's operating range allows interaction with the vehicle in spacious rooms and outdoors.

Who is this quad for?

Recommended for children 8 years old and older, the Double Eagle E383-003 remote-controlled quad is an excellent choice for young automotive and technology enthusiasts. With its versatile capabilities and safe design, it is the perfect toy for anyone looking for an active and creative form of entertainment.
