AnyCubic Photon Mono X2 3D Printer

AnyCubic Photon Mono X2 3D Printer
Take care of the smallest print detail and enjoy exceptional precision. The AnyCubic Photon Mono X2 3D printer delivers an accuracy of 48 μm and is equipped with a 9.1-inch monochrome screen. It also features a print speed of up to 60 mm/h. It is also compatible with many popular 3D printing software programs.

Print with exceptional precision
With the Photon Mono X2, you can easily create even the most detailed prints. The printer offers a 9.1-inch 4K+ (4096 x 2560 px) monochrome screen and delivers accuracy of up to 48 μm. As a result, it enables seamless printing of both small and larger models, guaranteeing incredible richness of detail.

Reliable light source
The printer is equipped with an improved AnyCubic LightTurbo array, which allows it to emit UV light both parallel and perpendicular to the LCD screen. As a result, it provides a much more even exposure, and thus better print quality.

Even greater accuracy
The Photon Mono X2 uses a dual linear rail and features a carefully considered vibration-absorbing design, providing a much more

accurate Z-axis. So you can enjoy stable printing and less layer visibility!

Additional amenities
The printer's plate has a laser-engraved checkerboard pattern that greatly improves adhesion and printing efficiency. It also includes a durable LCD screen protector that protects it from scratches and other types of damage. So you can easily extend its life!

Wide compatibility
The printer is also distinguished by its compatibility with a wide variety of 3D printing software. It works perfectly not only with the dedicated Photon Workshop software, but also with such applications as, for example, CHITUBOX, Lychee and others. You don't have to limit yourself!
