Flange Insert 21mm M5 Momcozy

The M5 Momcozy 21mm flange insert is an indispensable item that allows you to adjust the breast pump to your needs. It is compatible with the M5 breast pump from Momcozy. To ensure optimal performance and hygiene, it is recommended to regularly replace the flange insert every 1-3 months, especially if you notice a decrease in the pump's suction power. This will ensure that you are feeding your baby in the safest and most effective way.
