

Double Breast Pump Momcozy S9 Pro (white)

Double Breast Pump Momcozy S9 Pro (white)

Ref: 5906168434310

Momcozy S9 Pro Double breast pump.

The Momcozy breast pump provides an innovative solution for modern moms to pump milk efficiently and discreetly. The S9 Pro is 20% lighter than traditional devices for easy portability. Its performance allows for fast and efficient pumping, while lactation stimulation resembling a baby's suction provides comfort. The device is distinguished by its quiet operation of 45 dB and provides up to 9 pumping sessions on a single charge. The LED display makes it easy to monitor the battery status, and the automatic shut-off saves energy. The product has won awards from Reddot 2022 and National Parenting Products AWARDS 2023, and comes with 2 pieces to help you pump even faster for your baby.

Comfortable to wear

With a 20% reduction in size, the Momcozy S9 Pro breast pump fits easily into your bra without causing discomfort. Its light weight and lack of disturbing cords allow you to pump milk discreetly in any conditions - at home, at work, or on the go.

Ready to work all day long

The device is equipped with a high-capacity battery and a USB-C charging port that allows a full charge in just 2.5 hours. The breast pump provides 8 to 9 lactation sessions for a total of 270 minutes of operation. An automatic shut-off function after 30 minutes of inactivity increases safety and saves energy.

2 pumping modes

The Momcozy S9 Pro offers 2 pumping modes, including Expression, which mimics the rhythmic sucking of the baby, allowing the mother to effectively collect milk in less time. Mixed, on the other hand, combines short and fast suction with longer and deeper suction to stimulate the breasts in such a way as to increase milk production and trigger the milk flow reflex.

9 levels of suction

The device allows you to adjust the strength of the suction - you can choose from 9 levels of intensity. This allows you to customize the device to your individual needs, enjoying optimal efficiency and maximizing milk production.

Ease of use

To ensure optimal results and comfort using the Momcozy S9 Pro breast pump, it is recommended to choose the appropriate size of the insert (17 mm, 19 mm, 21 mm). Matching the tip to the size of the nipple is crucial for comfortable and effective milk extraction. It is also recommended that the amount of milk pumped does not exceed 120 ml, which is a guarantee of safe use and maintenance of proper hygiene of the device. The intuitive LED screen guarantees ease of use even at night.

Safety of use

BPU-free silicone materials were used to make the breast pump, which are safe for health and meet FDA standards. The quick and easy-to-install mechanism allows you to comfortably place the device in your bra and start lactation with one click. Cleaning is also effortless. In addition, the quiet operation of 45 dB will not disturb the baby's sleep.
