Intelligent LED strip Avatto SLS03 5m

Ref: 6976037361367

### Avatto SLS03 smart LED strip 5m

The Avatto SLS03 smart LED strip is a solution that combines functionality with aesthetics to create unique lighting effects in your home. The LED strip offers full control via a mobile app and voice assistants, allowing you to personalize the lighting according to your needs and mood. Ideal for creating ambience in the living room, bedroom or at parties, the Avatto SLS03 LED strip makes any interior more cozy and modern.

### Automation and connectivity function

Thanks to the automation function, the LED strip can be programmed to turn on and off at specific times, making it more convenient and allowing you to fully customize the lighting to your daily schedule. The option to create smart scenes that can be triggered with a single click makes it easy to adapt the lighting to different circumstances, such as movie screenings, reading or relaxation.

### Group control

The Avatto SLS03 LED strip offers a group control function that allows you to synchronize several LED strips in different rooms. This makes it easy to manage lighting throughout your home from a single app, increasing convenience and efficiency.

### Music modes

The LED strip offers four unique music modes: Rhythm, Roll, Energy and Spectrum, which synchronize the lighting to the rhythm of the music. A built-in microphone captures ambient sounds, allowing the colors and lighting effects to dynamically change to the rhythm of the music, creating an unforgettable atmosphere at parties and gatherings.

#### Voice control and mobile app

Integration with Amazon Alexa and Google Home allows for convenient voice control, making it easy to change settings hands-free. The SmartLife/Tuya Smart app provides full control of the LED strip, allowing you to adjust colors, brightness and modes from your smartphone, wherever you are.
