

Smart WiFi Touch Wall Switch Sonoff TX T5 3C (3-channel)

Ref: 6920075740257

Smart WiFi Touch Wall Switch Sonoff TX T5 3C (3-channel)

Sonoff TX T5 3C (3-channel) Wi-Fi smart touch wall switch.

Create a smart home with Sonoff. The TX T5 3C is a 3-channel wall switch that allows you to control your lighting conveniently. You can also control it remotely using voice commands or the eWeLink app. What's more, the product offers a timer function and colorful LED backlighting that you can customize. You can also personalize the look of the switch using the color panels (not included).

Voice control

Want to turn off the lights in your living room without having to get up from the couch? With the Sonoff TX T5 3C, that's not a problem. The wall switch works with assistants such as Amazon Alexa, Google Home and Alice. All it takes is a simple voice command - you no longer have to tear yourself away from your favorite show.

Two-way lighting control

The switch can be used as an eWeLink gateway. This allows you to create smart scenes that let both the TX T5 3C and the R5 or S-MATE (not included) control the operation of a single lamp. Enjoy the possibilities that Sonoff offers without all the unnecessary wiring.

Additional capabilities

The switch has a built-in timer that will allow you to customize the time at which the light will automatically turn off, and a colored

backlight around the switch will be activated. This allows you to easily locate the device after dark. What's more, it is possible to enable smart scenes.

Touch panel and color backlighting

The TX T5 3C is equipped with three buttons, so you can conveniently turn on the light, for example. The device will signal the command with a beep and gentle vibration. In addition, it offers 8 types of color backlighting - Party, Night Light and Color modes are available, among others. Choose the right one for you!
