Transmitter / Receiver BlitzWolf, BW-CS7, Wireless USB-C to HD

BlitzWolf Transmitter/Receiver, BW-CS7, Wireless USB-C to HD.

Now you can even more conveniently transmit images wirelessly. The BlitzWolf BW-CS7 Transmitter and Receiver are very easy to use and stand out with a range of up to 50 meters. They support resolutions up to 1080p at 60 Hz and provide a minimum latency of just 0.1 seconds. What's more, they weigh only 30 grams and are compact enough to easily fit in a purse, backpack or even a pocket.

Multiple applications

With the transmitter, you can wirelessly stream audio and video from your laptop, computer, tablet or smartphone to a larger screen, such as a TV, projector or monitor. This makes the product great for, for example, watching movies, giving presentations, holding online courses and more!

2 display modes

The transmitter supports 2 display modes, so you can customize its operation according to your needs. The Mirroring option allows you to duplicate the image - it will prove useful, for example, when giving presentations. Extension function, on the other hand, allows you to extend the screen - you will find it useful at work, among other things.

Great image quality

Enjoy exceptional richness of details when watching movies or showing your loved ones your vacation photos. The transmitter allows you to display the image in 1080p resolution at 60 Hz, which ensures excellent quality, beautiful colors and high saturation of details.

Easy to use

Forget about tangled cables and complicated setup. Thanks to its Plug&Play technology, the BW-CS7 is very easy to use - just connect the receiver to one device and the transmitter to another. You don't need to install any additional drivers or apps!

Range of up to 50m

BlitzWolf BW-CS7 will perform well even in very large rooms. The device supports 5G transmission technology, which provides a range of up to 50 m and extremely low latency (only about 0.1 s). What's more, one receiver can be paired with as many as four transmitters.
