

Smart ZigBee Switch Sonoff ZBMINIL2 (2 pcs)

Smart ZigBee Switch Sonoff ZBMINIL2 (2 pcs)

Ref: 6920075741872

Sonoff ZBMINIL2 ZigBee smart switch (2 pcs).

Do you want to manage your equipment more easily? With the Sonoff switch it will be possible! With its help you will get control over lighting. It is distinguished by its small size, so you can easily install it in different mounting boxes, and it also works with different types of switches. What's more, you can control it with your voice, as it is compatible with Google Home or Amazon Alexa. The set includes 2 switches.

Smart switch

The ZBMINIL2 Extreme switch is distinguished by its small size, so you can install it in various mounting boxes, even the smallest one - EU/86/120. In addition, it works with different types of external switches such as rocker switch or wall switch with buttons. The Sonoff device is also easy to install and does not require a neutral wire.

Multiple control options

The Sonoff smart switch has bidirectional control capabilities. You can easily connect it to your stairwell lighting. What's more, for even easier control, you can create smart scenes, and with the Timer function, you can set when you want the lights to turn on, off, or schedule timed loops.

Simplicity and reliability

For added convenience, the Sonoff switch has voice control capabilities, as it demonstrates compatibility with Google Home, Amazon Alexa or Alice. What's more, you don't have to worry about Internet problems, as the Sonoff brand device, with its Zigbee 3.0 switch, can connect to a Zigbee Hub and create a home LAN. In addition, you have the ability to control the lighting even if its power is only 3 watts.

Quick start

Connecting the smart switch is very easy. All you have to do is connect it with the right device and then download the eWeLink app. Now all you have to do is pair your phone and the equipment using Bluetooth technology. This allows you to exercise control over your entire home even if you are at work or shopping.

Security guarantee

The ZBMINIL2 switch is a guarantee of safety, which is why its housing is made of PC plastic with a fire resistance rating of V-0. What's more, terminal strips guarantee the safety of the wires and ensure their reliable connection. The switch is also equipped with EFR32MG22 core, which features low power consumption. All this means that you can safely use the ZBMINIL2 smart switch.
