

Smart Visual Ear-Clean Rod Bebird R1 black

Ref: 6972403827796

Smart Visual Ear-Clean Rod Bebird R1 black

Bebird R1 ear cleaning otoscope with camera (black).

Ensure complete safety during in-depth ear cleaning. The Bebird R1 otoscope is equipped with an endoscopic camera, using a CMOS sensor and supporting 8 MP HD resolution, so you can enjoy a view of your ear canal from the dedicated app to avoid damage during care. The Wi-Fi chip is responsible for a stable connection, and the silicone-made tip guarantees safe use. In addition, the LED backlight makes it easy to perform routine cleaning. A variety of accessories are included to enhance the device's functionality.

Insight into the inside of the ear

Enter the era of modern care and take care of your ears with Bebird. The R1 otoscope is equipped with a camera that supports HD resolution of 800 watts, which translates into high-quality images so you can analyze the inside of your ear canal in-depth and accurately remove earwax without risk of damage. A dedicated bebird app, available in the App Store and Google Play stores, allows you to view the camera's images in real time. Thanks to the high-end Wi-Fi chip, the connection is always stable and the cleaning process is seamless. In addition, a 6-axis gyroscope guarantees reliable image stabilization, and a speed of 20 fps allows for smooth monitoring of the inside of the ear canal.

LED backlighting

The Bebird R1 otoscope offers a shadowless LED lamp, which is equipped with 6 LEDs that provide cold light. This allows you to freely

explore the inside of your ear and make sure you don't miss any part during cleaning. The illumination, combined with a high-end camera, also allows you to look at the smallest details and structure inside the ear.

Safe to use

The included ear spoon is made of soft and skin-friendly silicone that meets strict food-grade requirements. The rounded Q-shaped design makes it easy to clean the ear, ensuring safe use. In addition, the non-slip structure of the device eliminates the risk of your hand slipping and causing injury to your ears. You'll also find practical, interchangeable accessories included, so the Bebird R1 otoscope can be used hygienically by several people.

Powerful rechargeable battery

Thanks to its 180 mAh battery, the Bebird R1 otoscope can operate for 70 minutes on a single charge. The time it takes to recharge it is just one hour. As a result, you can enjoy comprehensive ear care without having to charge the device frequently.

Included:

Otoscope with camera
Ear spoon
Cotton ear swab
Charging cable
Storage tube

Manufacturer: Bebird
Model: R1
Pixels: 8 Megapixels
Lens diameter: 3.5 mm
Optimum focal length: 12 ~ 15 mm
Gyroscope: 6-axis
Image transmission speed: 20 frames per second
Image sensor: CMOS
Operating frequency: 2.4GHz
Network standard: IEEE 802.11b/g/n
Battery capacity: 180 mAh
Operation time: approximately 70 minutes
Charging time: approximately 60 minutes
Operating temperature: from -10 to 45°C
Input parameters: DC5V 0.5A
Weight of the rod: 13 g
Color: Black
