EJEAS MS8-SE Motorcycle Intercom

The EJEAS MS8-SE motorcycle intercom allows you to communicate safely and conveniently while riding. Thanks to the latest Mesh 3.0 technology, the device allows up to 6 people to communicate over a distance of up to 1000 meters. The 1,200 mAh battery provides a long operating time, and the IP67 water resistance allows you to communicate and listen to music freely in any weather conditions.

Long operating time

The MS8-SE intercom uses a 1,200 mAh rechargeable battery that provides a long operating time - up to 29 hours of music listening and 9 hours of talk time in Mesh mode. All this with just a 3-hour charging time. You don't have to worry about having to renew power frequently during long runs.

Mesh 3.0 technology

The device supports the latest Mesh 3.0 technology, which allows a group of up to 6 people to connect over a distance of up to 1,000 meters. This allows each participant to communicate with others without hindrance, which greatly improves the safety and comfort of the ride. The intercom provides a stable connection even in difficult terrain conditions.

IP67 water resistance

The MS8-SE is water resistant, as confirmed by the IP67 certification. The device can be used in the rain without risk of damage. The robust design also protects against dust. The intercom can even be submerged to a depth of 1 meter for 30 minutes.

Noise reduction

CVC technology reduces noise and 3D sound effects, providing crystal clear audio even at high speeds. Automatic adjustment of the microphone sensitivity according to the speed of driving allows for comfortable conversations without interference.

Support for music and FM radio

The EJEAS MS8-SE supports music and FM radio playback. With the collaborative listening function, everyone in the group can enjoy the same songs, which improves the atmosphere while driving. The ability to take phone calls and listen to music at the same time is an added advantage that enhances convenience.

Voice assistant support

The device supports voice assistants, including Siri, making it even more convenient to use phone functions without having to take your hands off the wheel. Simply issue a voice command to answer a call or change a song, for example.

Versatility and ease of use

The SafeRiding app allows group management, music control, FM radio operation and software updates. The intercom also offers automatic call answering and channel switching, allowing you to adjust the sound quality to suit your driving conditions.
