

Cavitation peeling ANLAN 01-ACPJ32-02A (white)

Cavitation peeling ANLAN 01-ACPJ32-02A (white)

Ref: 6953156301658

ANLAN cavitation peeling 01-ACPJ32-02A (white).

ANLAN cavitation peeling will allow you to take comprehensive care of your facial skin. Thanks to the combination of phototherapy, ultrasonic vibrations, EMS microcurrents and ions, the device thoroughly cleanses the face, facilitates the absorption of nutrients and tightens the skin. You can also use it while bathing - the product is water resistant (IPX7). Charging, on the other hand, will be facilitated by the included base with USB-C cable.

Sonic mode

Blackheads, makeup residue, excess sebum, blackheads - these and other problems are a thing of the past. Cavitation peeling uses ultrasonic vibrations (24,000) and blue light with a wavelength of 470 nm to effectively cleanse the facial skin and prepare it for the next skin care steps.

Use of negative and positive ions

Increase the effectiveness of used cosmetics by up to 20 times. ION+ mode uses ultrasonic vibrations, positive ions and blue light. As a result, it thoroughly cleanses the facial skin. On the other hand, the ION- cavitation peeling mode combines ultrasonic vibrations with negative ions and red light, which facilitates the absorption of nutrients.

Restore skin firmness

Loss of skin firmness causes wrinkles - with ANLAN cavitation peeling you can change that. The EMS mode combines ultrasonic vibration, EMS microcurrent and red light. As a result, it tightens the skin and reduces the appearance of wrinkles restoring the skin to a healthy, youthful appearance.

Included

cavitation peeling USB-C charging cable charging base user manual

Manufacturer ANLAN Model 01-ACPJ32-02A Color white Dimensions 173 × 42 × 14 mm Weight approx. 130 g Battery capacity 500 mAh Charging time approx. 2 h Working time approx. 60 min Rated voltage 3.7V Light wavelength Red: 610 ± 10 nm, Blue: 470 ± 10 nm Vibration frequency 24,000 times per second (24 kHz) Input voltage 5V/1A Waterproof IPX7 (product can be submerged to a depth of 1m for 30 min) Timer Automatic shutdown after 5 min of non-use
