

Selfie stick TELESIN with ball head for action cameras

Ref: 6974944461705

Selfie stick TELESIN with ball head for action cameras

TELESIN selfie holder with round head for sports cameras

Take your filming skills to a new level with the TELESIN selfie holder with round head. This practical accessory is ideal for dynamic shots, both on land and underwater. You can adjust its length in the range of 232-654 mm, and thanks to the silicone-coated handle, you will ensure comfort in use.

Compact and durable

The TELESIN selfie holder is made of high-quality aluminum alloy and silicone, which makes it durable and lightweight. With a weight of only 150 g and an adjustable length from 232 mm to 654 mm, it is very easy to carry and ideal for a variety of applications. What's more, the product is waterproof - perfect for recording exceptional shots underwater.

Fully adjustable round head

The mount is equipped with a ball joint that allows you to quickly switch between horizontal and vertical modes, as well as full 360° rotation. Such a solution allows you to create creative shots from different angles, which is especially useful when recording dynamic scenes.

Non-slip grip and safety

The grip handle is covered with silicone with a non-slip texture, which guarantees a secure grip even when your hands are wet. In addition, the wrist strap prevents you from accidentally dropping the grip, making it safer to use, especially during physical activity.

Versatile compatibility

The TELESIN mount is equipped with a 1/4-inch hole on the bottom, which allows you to conveniently mount additional accessories, such as a tripod, for example. What's more, the accessory is compatible with a wide range of sports cameras (including those with waterproof housings).
