Gravity car holder with charger Choetech T203-F, 15W (black)

Choetech T203-F gravity car mount, with 15W charger (black)

Let your travels become even more comfortable and safe with a car mount, equipped with a 15W charger. Not only will it provide a stable mount for your smartphone, but it will also take care of its fast charging, so you'll always be ready for action. Choetech T203-F meets the highest safety standards, as evidenced by numerous certifications such as ETL, RCM, FCC, CE and RoHS. So you can be sure that the product is not only efficient, but also safe to use.

High charging performance

Choetech T203-F is equipped with a 15W charger, which guarantees fast and efficient charging of your device. With an input of 5-12V/2A and an output of 15W (max), you can be sure that your smartphone will always be charged, regardless of the length of your trip. Charging is done through a USB-C interface, ensuring a fast and stable connection.

Gravity-based attachment mechanism

The mount uses an innovative gravity mechanism that automatically adjusts to the size of your phone. Simply place your phone in the holder and the arms automatically close, providing a stable and secure hold. This allows you to focus on driving without worrying about your phone.

Durable and secure design

Made of high-quality materials such as fire-resistant ABS, PC and silicone, the Choetech T203-F mount guarantees durability and safe use. These materials not only resist high temperatures, but also ensure that your phone is protected from scratches and damage. In addition, the compact size makes the holder discreet and space-saving.

Easy installation and universal compatibility

Choetech T203-F is extremely easy to install thanks to the included air vent clip. The universal design makes it compatible with most smartphones on the market. A 1-meter USB-C cable is also included, making it even easier to connect and charge devices.

Included

Holder with 15W charger

Bracket for mounting on the ventilation grille

USB-C cable 1m
