TWS Earphones Choetech BH-T24 Stereo Sound DNS (dark blue)

TWS Choetech BH-T24 headphones are a perfect combination of modern technology, elegance and comfort. They make every moment spent listening to music or talking on the phone more comfortable and enjoyable. The stylish navy blue color adds to their elegance, while the advanced technologies provide a superior sound experience. Equipped with the 5656E chip and Bluetooth 5.3, they offer stable wireless connections and high sound quality. Their ergonomic design and sturdy construction with eco-friendly materials make them an ideal choice for active people looking for reliable headphones for everyday use.

5656E chip and Bluetooth 5.3

The BH-T24 headphones use an advanced 5656E chip, which, combined with Bluetooth 5.3 technology, provides extremely stable and fast wireless connections. This technology minimizes latency and interference, which is crucial when listening to music and making phone calls. The transmission range of up to 10 meters allows you to move freely without losing signal quality, which is ideal for users who value mobility and convenience.

Excellent sound quality

The 13-millimeter copper-ring speakers with 32Ω impedance provide high quality sound. So you can enjoy a clear and balanced sound that perfectly captures every detail of the music. Deep bass, clear mids and crisp highs make listening to music a real pleasure.

Fast charging and performance

The BH-T24 headphones feature a fast charging time of 1.5 hours. The 30mAh battery with a protective plate allows 4 hours of music playback at 80% volume on a single charge. In addition, a 300mAh charging case also with a protective plate allows the headphones to be fully charged in 1.5 hours, extending their use to 17 hours. This allows for long listening sessions without the need for frequent charging, which is ideal for active and frequent travelers.

Durable and eco-friendly materials

The use of durable and eco-friendly PC+ABS materials guarantees the headphones' durability and low environmental impact. On the other hand, the sturdy construction ensures a long life of the device, making it a suitable choice for eco-conscious people.

Compact design

The headphones' compact size of 57.7 x 46.5 x 24.8mm makes them easy to store and comfortable to wear. The ergonomic shape ensures comfort even during prolonged use, and the lightweight design minimizes ear fatigue, which is ideal for active people.
