Tactical Flashlight HOTO QWSDT005, 2300lm, IP68, 3100mAh, USB-C

HOTO QWSDT005 flashlight, 2300lm, IP68, 3100mAh, USB-C

Are you looking for a reliable flashlight that works for many applications? Opt for the HOTO QWSDT005! This practical device is distinguished by a maximum brightness of 2300 lm and a range of up to 300m, and thanks to its IP68 water resistance and robust construction it will not be intimidated by demanding conditions. Various light modes are also available. The flashlight can be powered in 2 ways - from a built-in 3100 mAh rechargeable battery, or with replaceable CR123A batteries.

Bright light with long range

Ensure optimal illumination. The HOTO flashlight offers a maximum brightness of 2300 lm, a color temperature of 6500K and a range of up to 300m - it will work in almost any situation. Moreover, in Steady Beam mode you can choose from 3 levels of light intensity - 100 lm, 400 lm or 1500 lm. This way you can easily adjust the device's performance to your current needs! There is also a Strobe mode, which provides very bright, flashing lighting.

Multiple uses

This practical flashlight will be perfect for a variety of applications. You will successfully use it, for example, when hiking in the mountains - if your expedition drags a bit, you will easily light your way home. The device will also come in handy at home when the power goes out. You can also use it for self-defense - the Strobe light mode will allow you to blind and surprise a possible attacker.

2 ways to power

Be prepared for any circumstances and be sure that the flashlight will not refuse to serve you at the least opportune moment. The device can be powered in 2 ways - its primary power source is a built-in 3100 mAh battery. You also have two replaceable CR123A batteries at your disposal, which will be perfect as a backup emergency power supply. Now even if the flashlight runs out, you will still be able to use it!

Robust design

With HOTO flashlight you will not be intimidated even by extremely demanding conditions. The device is distinguished by its IP68 water resistance, so you can use it regardless of the weather without worry - rain or accidental splashing are no threat to it. In addition, solid aluminum was used to make the product, which gives it exceptional durability. An additional advantage of the flashlight is a reinforced frame, which protects the lens from damage.

Tailored to your needs

Provide yourself with a flashlight that will not let you down. The HOTO QWSDT005 is distinguished by its incredibly fast response time, which is only about 0.2 seconds. It is also equipped with a practical metal clip, so you can easily attach it to your backpack. The device also has 2 buttons - one is located on its top and the other on the bottom. Thanks to this, you can successfully use it both on a daily basis and as a tactical flashlight.
