Redtiger T700 video recorder

The Redtiger T700 mirror car camera is an advanced driving recorder that offers excellent image quality, a large touchscreen and advanced safety features. It is ideal for any vehicle, providing full protection and recording events on the road. Thanks to its super-capacitor and high temperature resistance, the T700 camera works reliably in all conditions. In addition, built-in GPS and advanced night recording features ensure full safety and control over what is happening around your vehicle.

Exceptional image quality

The Redtiger T700 front camera records in 3840 x 2160P, 2560 x 1440P and 1920 x 1080P resolutions, while the rear camera records in 1920 x 1080P. This means that all recordings are extremely detailed, allowing you to easily recognize license plates, road signs and surrounding details. This ensures that every key moment is captured with the utmost precision, which can be invaluable in the event of a collision or other traffic incident.

Large IPS touchscreen

The mirror camera is equipped with an 11-inch IPS touchscreen that provides a wide viewing angle and a clear and bright image. The large screen makes it easy to navigate menus and view recordings from the front and rear of the vehicle, which translates into a comfortable user experience.

Supercapacitor and high temperature resistance

The use of a supercapacitor instead of a traditional battery ensures longer device life and better performance in extreme temperatures. The T700 camera operates reliably from -20°C to 70°C, making it ideal for use in any situation. This means you don't have to worry about the camera's performance even in the harshest weather conditions.

Loop recording and G-sensor

The loop recording function allows the camera to automatically overwrite the oldest files when the memory card is full, ensuring continuous recording without having to manually delete old files. The built-in G-sensor automatically detects sudden shocks or collisions and locks recordings to prevent accidental deletion. The T700 also offers two parking monitoring modes: 24/48H continuous recording and G-sensor-triggered emergency recording. This keeps your car safe even when it is stationary. This solution provides full protection for your vehicle around the clock, which is especially useful when parking in high-risk areas.

GPS and route recording

The T700 has a built-in GPS that accurately records your route, speed and other driving data. With Redtiger GPS Player software, available for Windows and Mac, you can review and analyze your recordings along with the GPS data. This not only helps you monitor your route, but also provides crucial evidence in the event of an accident or traffic dispute.

Night vision and WDR

The advanced Super Night Vision feature, F1.8 aperture and six-lens lens provide clear images even in low-light conditions. WDR (Wide Dynamic Range) technology optimizes recordings by eliminating overexposure and shadows, enhancing image quality both day and night. This ensures that all recordings will be clear regardless of lighting conditions.

Included

- T700 mirror car camera
- GPS receiver
- Cable straps x 5
- Car charger x 1
- Reversing camera x 1
- Straps x 4
- Reversing camera cable x 1
- 3M sticker x 1
- Mounting bracket x 1
- Screws x 4
- Owner's manual x 1
- Tool x 1
- Cleaning cloth x 1
