

Battery For Power Tools Green Cell PTML18V5, Milwaukee M18 1

Ref: 5904326375109

Battery For Power Tools Green Cell PTML18V5, Milwaukee M18 18V 5Ah

Green Cell PTML18V5 power tool battery, Milwaukee M18 18V 5Ah

The PTML18V5 Green Cell battery for power tools is a perfectly manufactured model based on high-quality cells. The battery case is made of durable plastic to meet the work in harsh conditions and protect it from damage. With Li-Ion cells, it allows you to achieve maximum performance and power of drills, screwdrivers and other power tools. Provides a great fit and trouble-free operation with any original equipment and the manufacturer's charger. High battery life is up to 1,000 full charge cycles to ensure full performance of the device for 3 years of intensive use.

Efficient work - even longer and with maximum power

Battery for your screwdriver, drill or grinder? Get the most out of your power tools' runtime potential. Green Cell batteries are characterized by high, real capacity and provide a constant and stable supply of energy to your devices, allowing you to achieve maximum power while working. In addition, with an additional battery, you can work faster and more efficiently. While one battery is in use, the other can charge.

Get back the full power of your device

Don't let a discharged battery interrupt your work. Green Cell brand batteries dedicated to a variety of power tools are a guarantee of the highest power and capacity, with full compatibility and safety. The modern lithium-ion cells used in Green Cell batteries allow you to

achieve even better results during work. And the excellent service life of up to 1,000 full charge cycles will ensure full performance of the device for years to come.

Reliable quality confirmed by tests

Made to the highest standards and using high-quality components, power tool batteries are durable and, most importantly, a great fit for many of your cordless devices. They are a proven choice and quality confirmed by tests conducted by specialists in Poland. What's more, Green Cell batteries meet the highest safety standards to ensure peace of mind and complete comfort.

Compatibility and full compatibility with selected devices

Green Cell batteries offer a wide range of applications - this is thanks to great compatibility and full electronic compatibility with many rechargeable power tools. How to choose a battery? Check the brand, voltage and battery model on the rating label of your battery. If it agrees with the parameters of our battery, it means it will fit. No worries if we do not have a battery with exactly the same capacity (Ah). You can choose a battery with a higher capacity from our offer and enjoy longer operation of your tool.
