Blackview AirBuds 8 wireless headphones (black)

With the Blackview AirBuds 8 headphones, nothing will stop you from listening to your favorite playlists anymore! Equipped with dynamic drivers, they allow you to reproduce every nuance of sound, from the subtlest details to the deepest bass, while maintaining clarity and tonal balance. Advanced noise cancellation technology allows you to enjoy crystal clear sound, regardless of your surroundings, while the durable battery guarantees long hours of music playback. Thanks to IPX7 water resistance, you can use them without worry during intense workouts or in adverse weather conditions, confident that rain or sweat won't interfere with your musical adventure.

Sound that pushes the limits

The headphones are equipped with 13-millimeter dynamic drivers with a responsive PU and PEEK composite diaphragm. As a result, they deliver powerful, punchy bass, richer mids, all with minimal sound distortion. What's more, the finely tuned sound lets you hear every detail of the song for an immersive audio experience.

Active noise cancellation for complete concentration

Focus on your favorite music or podcasts, regardless of the surrounding noise. Advanced Active Noise Cancellation (ANC) technology eliminates all disruptive ambient noise, allowing you to immerse yourself in the sounds of your music. But that's not all - Ambient Sound mode allows you to safely use the headphones in places where you need to be aware of your surroundings, such as when walking around

town or waiting for an announcement at the airport.

Hassle-free phone calls

Blackview AirPods 8 have four built-in microphones with advanced ENC (Environmental Noise Cancellation) technology. ENC technology effectively reduces ambient noise, allowing you to make phone calls with pristine sound clarity, even in noisy places. This means you don't have to worry about interference during important business calls or interactions with loved ones.

Reliability all day long

Now you can enjoy your favorite music all day long, without the need for frequent charging. The AirPods 8 offer an impressive runtime. With ANC on, they can run for 6 hours on a single charge, with the ability to extend playback time to 27 hours with the charging case. And with ANC off, the runtime reaches 6.8 hours, and up to 30 hours with the charging case. Plus, just 10 minutes of charging is enough to play music for another 3 hours!

Ergonomic design for your comfort

Discover the perfect harmony between comfort and functionality. The carefully thought-out design of the headphones fits perfectly to the ear, ensuring not only comfort, but also wearing stability even during physical activity. The IPX7 water resistance makes them sweat and rain resistant, making them an ideal choice for those with active lifestyles. You'll also find interchangeable rubber bands in different sizes to customize the headphones to your preferences.

Smart control

The AirPods 8 feature intuitive touch panels that allow you to conveniently manage the most important functions. Using them, you can change songs, answer or disconnect phone calls, activate noise cancellation mode and much more - just by gently touching the handset!

Included:

headphones
replaceable rubber bands x3
charging case
