DEKCO DC5L Wi-Fi outdoor camera

Keep yourself and your loved ones safe. The DEKCO DC5L outdoor camera offers 2K QHD resolution, a wide 166° viewing angle, color night vision, intelligent motion detection, and integration with Google Assistant and Alexa. With remote access, 24/7 recording functionality and the ability to store recordings both locally and in the cloud, the device guarantees peace of mind and protection at the highest level.

High image quality in all conditions

The DEKCO DC5L camera offers 2K QHD resolution to capture clear and detailed footage. This makes every situation perfectly visible, and makes identifying intruders or analyzing events simpler and more precise.

Wide viewing angle

With a wide viewing angle of 166°, the camera covers most of its surroundings, eliminating blind spots. Images from the two lenses are combined and together form a clear 180° panoramic image. The DC5L is able to monitor the garage, the front door and the garden at the same time, making surveillance more effective.

Full-color night vision

Advanced color night vision technology allows the camera to capture full-color images even in the dark. The DEKCO device is therefore an excellent choice for those who do not want to be limited by monochrome images at night.

Intelligent motion detection and alarm sirens

The DC5L supports intelligent motion detection. When suspicious activity is detected, the camera triggers an alarm and a push notification is sent, which can be read from the dedicated DEKCO app. You can customize motion detection zones to focus on the most important areas. You don't have to worry about false alarms - the device only focuses on real threats and accurately recognizes people.

Two-way audio communication

With a built-in microphone and speaker, the DEKCO DC5L camera allows two-way audio communication. You can remotely talk to people within range of the device, which is ideal for communicating with visitors and couriers. The solution used also allows you to deter intruders. The voice change function provides additional security and anonymity.

Convenient storage of recordings

The DEKCO DC5L camera offers the ability to store recordings both on a local SD card (not included) and in the cloud. The 24/7 recording function ensures that no important event is missed.

Remote access and multi-user use

With the mobile app, you can enjoy access to the camera's video from anywhere in the world. In addition, the ability to integrate with Google Assistant and Alexa make managing the camera extremely convenient. Monitor your surroundings with voice commands and be sure that everything is under control. In addition, the device can be operated by several users simultaneously, making it ideal for families or small businesses.

Reinforced antenna and stable connection

The DEKCO device is equipped with an upgraded 5dB antenna that provides a faster connection and greater Wi-Fi signal range (2.4GHz). In addition, the camera is water and dust resistant, so weather conditions will not affect its performance.

Included:
