

Lubluelu L20 cleaning robot

Lubluelu L20 cleaning robot

Ref: 6977335210104

Lubluelu L20 cleaning robot

Don't waste your time cleaning and let the Lubluelu L20 robot take care of it for you. This unique device offers a suction power of 4,000 Pa, so it can handle dirt very well. It can also wet mop floors. It has a maximum run time of up to 120 minutes, and its advanced LiDAR navigation system allows it to navigate through rooms with ease. The product is also compatible with the Smartlife / Tuya app, which allows you to conveniently manage its work.

Fast and thorough vacuuming

Thanks to its high suction power of up to 4,000 Pa, the robot will quickly and effectively deal with even stubborn dirt. Dust, crumbs, hair - nothing can resist it. Despite such great capabilities, the device works surprisingly quietly - its volume level is only about 55 dB. You can also choose from 3 suction modes to adjust its performance to your needs. What's more, the robot automatically increases its power on carpets to guarantee thorough, reliable cleaning.

It will get rid of stubborn stains

The Lubluelu L20 will not only vacuum the floors in your home, but also wet-clean them. The robot allows you to choose from 3 levels of water flow and can mimic manual mopping, so it can perfectly handle even stubborn stains. It is also equipped with a filter to eliminate dirt and an electronic pump to prevent leaks. Soon the floor in your home will be spotlessly clean!

Up to 120 minutes of cleaning

The robot is equipped with a powerful 2600 mAh battery, which allows it to work for up to 120 minutes. This is enough to thoroughly clean the floors even in a larger apartment! Charging the device won't be a problem either. When its battery is about to run down, it will automatically head to its station, and when it recharges, it will simply go back to work.

Nothing will stand in its way

Thanks to its advanced LiDAR navigation system with a range of up to 8 meters, the robot easily navigates through rooms, avoids obstacles, creates accurate maps and plans optimal cleaning routes. The device is also equipped with high-precision sensors that protect it from falling, bumping and locking itself under furniture. In addition, the L20 easily overcomes thresholds and carpets up to 20 mm high.

Simple and convenient operation

Connect the robot with the Smartlife / Tuya app and gain access to many useful functions. With its help, you can, for example, enable spot or along the edges vacuuming, change settings, select the area that should be cleaned, plan a work schedule, create a forbidden zone and much more. In addition, the L20 is compatible with Google Assistant and Amazon Alexa, so you can control it with your voice. Say a simple command and watch the robot get down to cleaning!

Included
