MOFII Wireless Keyboard+Mouse iBean Pro New 2.4G (Pink)

MOFII iBean Pro New 2.4G Wireless Keyboard+Mouse Set (pink)

Discover a new dimension of work and entertainment with the MOFII iBean Pro set, consisting of a keyboard and mouse. The hardware provides total freedom of action thanks to 2.4GHz RF Autolink technology and will delight anyone who cares about precision and responsiveness. The compact size of the keyboard and ergonomic design of the mouse make the set an excellent choice for both office and home use.

High precision

The mouse with 1200 DPI optical precision allows for smooth and precise control. As a result, you'll enjoy productivity and convenience on a daily basis.

Ergonomic design

The keyboard with 68 standard keys and the mouse with three buttons and a scroll wheel are designed for comfortable operation. The mouse weighs only about 80 grams and the keyboard about 419 grams, making them easy to carry and use in a variety of places.

Long-lasting durability and reliability

Both MOFII iBean Pro devices are equipped with switches with a lifespan of up to 8 million clicks, guaranteeing long and trouble-free use.

In addition, the keyboard offers features such as FN+ESC key combinations for quick and easy adjustments.

Performance

The hardware uses a USB 1.1 interface and offers a fast sensor response time - as fast as 3,000 times per second. It operates in the 2.4GHz RF band with FSK modulation and FHSS hopping, ensuring a stable and secure connection. The keyboard and mouse operate on 34 channels, which minimizes interference.

Low power consumption

It takes one AA battery to power the mouse, and two AAA batteries to power the keyboard. In sleep mode, the mouse consumes only 0.45 mA, allowing long periods of operation without frequent battery changes.

Compatibility

The kit is compatible with Windows 2000, XP, Vista, 7, 8 and 10, so you can conveniently connect it to multiple devices.

Included:
