Gaming Controller GameSir X2s USB-C with Smartphone Holder

GameSir X2s USB-C mobile controller with phone holder

Take your gaming experience to the next level and play AAA games comfortably. GameSir X2s is an advanced mobile controller that offers precision, reliability and comfort. Thanks to Hall Effect technology in the sticks and triggers, the device guarantees accuracy of up to 0.1 mm and eliminates the problem of drifting. The rubberized surface allows for a firm grip, and the life of the mechanical buttons reaches up to 3 million clicks. The product is equipped with a USB-C connector, which ensures compatibility with iPhone 15 series and Android-based devices.

Hall Effect technology

GameSir X2s uses Hall Effect technology and provides up to 5 million cycles of use without worrying about drift. Magnetic sensors guarantee precise control and longevity. Hall Effect triggers offer unparalleled smoothness and responsiveness. For FPS and action gamers, there is an option to quickly switch to Hair Trigger mode by holding down the Capture + LT/RT buttons for 2 seconds.

Turbo function - no more lag

With the GameSir X2s controller, you will finish every game victoriously. The controller allows you to easily activate the Turbo function, which provides faster shooting without lag. The front silicone buttons have a touch-sensitive switch, and using them is highly comfortable. The LB and RB are equipped with micro-switches, which bring an e-sports, mechanical feel and also support the Turbo

function.

Key to the world of gaming

Play your favorite games and test new possibilities. The GameSir X2s controller supports a variety of games on iOS and Android platforms, providing full support for the latest titles such as Genshin Impact, Minecraft and Call of Duty: Mobile. The device also supports cloud-based gaming platforms, including Xbox Game Pass, Nvidia GeForce Now, PS Remote Play and others. Broke a new record and want to brag? Use the capture button and share a selected moment from your game! With just one press, you can take a screenshot in PC and Android modes.

Personalize your software

The GameSir app allows you to create personalized controller profiles, customize the dead zones of the sticks and triggers, change the A/B, X/Y layout and switch between analog mode and Hair Trigger mode. This allows you to customize the device's operation to suit your playing style.

Inspired by the Nintendo 2DS

The retro-style design is inspired by the classic look of the Nintendo 2DS, giving the controller a nostalgic feel. At the same time, the device retains modern features and ergonomics that will meet the needs of today's gamers. When designing the GameSir X2s controller, the focus was on comfort during long gaming sessions. Its rubberized, non-slip surface provides comfort and allows a firm grip even during the most intense gaming moments.

Great compatibility

Thanks to its USB-C connector, GameSir X2s is compatible with Android-based devices and iPhones from the 15 series, and you can successfully use it with modern foldable phones. The controller supports devices from 110 to 168 mm in length and guarantees a stable connection.
