Heiman WS2WL Tuya WiFi smart flood sensor

Heiman WS2WL Tuya WiFi smart flood sensor

The Heiman WS2WL is designed to detect water leaks in homes. Using wireless WiFi technology, it instantly alerts when a leak is detected and sends notifications to your mobile device via the Tuya (Smart Life) app. Thanks to its high precision and sensitivity, it can operate stably for a long time, providing protection against flooding.

Early detection of water leaks

The Heiman WS2WL flood sensor provides early detection of water leaks or freezing conditions, allowing you to take quick action to prevent damage. This can help you avoid costly repairs and water damage.

Battery-powered

The device is powered by a CR123A battery, which is included in the kit, ensuring simple operation and hassle-free replacement. The battery allows the sensor to operate for a long time without the need for frequent recharging.

Smartphone notifications

WiFi technology allows you to send notifications when a water leak is detected to your phone and the phones of other household members. In the event of an emergency, you receive immediate information, allowing you to react quickly and minimize potential

damage.

Compact and modern design

The Heiman WS2WL flood detector features a modern and compact design that allows it to be placed in hard-to-reach places, such as by dishwashers, refrigerators, water heaters, toilets or under sinks. It is also ideal for use in basements or garages.

Manufacturer Heiman Manufacturer code WS2WL Operating voltage DC 3V (1x CR17335/CR123A battery) Alarm indication Blue LED indicator Alarm sound ≥ 75 dB@1m Network WiFi 2.4GHz WiFi protocol IEEE 802.11 b/g/n Operating temperature 0°C to +50°C Operating humidity $\leq 95\%$ RH (non-condensing) Dimensions $\varnothing 69.0$ mm x 27.6mm Protection level IP67
