

IMOU HX21 Dual-Band WiFi Router

IMOU HX21 Dual-Band WiFi Router

Ref: 6976391037533

IMOU HX21 Dual-Band WiFi Router

The IMOU HX21 is an advanced router that offers an incredibly fast and reliable Internet connection thanks to Wi-Fi 6 technology, and is ideal for 8K/4K video streaming and dynamic online gaming, among other applications. It offers speeds of up to 3 Gbps (574 Mbps on 2.4GHz + 2402 Mbps on 5GHz), and is conveniently operated and configured with the dedicated Imou Life app.

Advanced Wi-Fi 6 technology

The router uses Wi-Fi 6 technology, which offers increased efficiency thanks to OFDMA. This makes it possible for multiple users to use the Internet simultaneously without losing speed. The fast and stable connection offered by the HX21 is perfect for watching movies, live streaming, playing network games and more!

IMOU Link™ Mesh Networking

Imou-Link technology makes it easy to create a mesh network with a unified Wi-Fi name, providing seamless Internet access throughout the home. This makes setup much easier!

Built for IMOU cameras

The router automatically connects to the nearest IMOU cameras for a quick and hassle-free setup. It also offers Stream Accelerate, which

uses a dedicated channel to transmit data from these devices. As a result, you can enjoy smooth monitoring and minimized data loss - even on busier Wi-Fi networks.

Remote configuration

Install the Imou Life app and gain the ability to remotely manage your router and connected devices from anywhere. Among other things, you can use it to conveniently operate IPTV, configure Wi-Fi for guests and set parental controls. All it takes is a few clicks on your phone!
