Blackview Tab 30 2+64GB WiFi Tablet (Pink)

The Blackview Tab 30 Kids is a versatile tablet designed specifically with kids in mind. Featuring a 10.1-inch HD IPS display, a powerful 5100mAh battery and Android 13 - it offers a rich ecosystem of educational apps and games. With advanced parental controls, a durable protective case and an easy-to-use interface, it's the perfect device for both learning and play.

Display and design

The tablet is equipped with a 10.1-inch HD IPS display with a resolution of 800x1280, which provides a clear and vivid image. The slim design with a thickness of 9.85mm and a weight of 520.5g makes the tablet comfortable to use - even for small children's hands. It also comes with a lightweight and drop-resistant case made of soft TPU material, which further protects the device from damage and can act as a stand.

Apps and educational features

The tablet offers four main tabs: Play, Read, Watch and Make, which offer a variety of educational and entertainment content. The "Play" tab features teacher-approved apps and games, "Read" offers high-quality books, "Watch" provides access to YouTube Kids videos, and "Make" encourages creative DIY activities.

Parental control

The Blackview Tab 30 Kids is equipped with advanced parental control features that allow you to create time limits, manage content and monitor your child's activities. Parents can set bedtimes, limit time spent on the tablet and block inappropriate content, ensuring safe, kid-friendly use of the device.

Performance

The tablet runs on an Allwinner A133P processor with four Cortex-A53 cores, ensuring smooth performance and low power consumption. It is also equipped with 2 GB of RAM (expandable to 4 GB) and 64 GB of internal memory, which can be expanded to 128 GB with a TF card. In addition, a 5100 mAh battery provides long battery life, and support for WiFi 6 guarantees a fast and stable internet connection.

Cameras and sound

The device is equipped with two cameras - front and rear (5 MP and 2 MP, respectively), which allow children to capture important moments, scan documents and take photos. Its additional advantage is the dual BOX speakers, which provide clear and powerful sound. This makes the Tab 30 Kids tablet ideal for listening to music, watching movies and playing games.

Operating system and personalization

The Blackview Tab 30 Kids runs on Android 13, and offers specially designed themes for kids and the ability to set different languages for different apps. A power-saving mode helps extend battery life, and tools such as an alarm clock, stopwatch, timer and sleep mode help with time management. Various privacy settings are also available.

Safe space for kids

The Blackview Tab 30 Kids tablet offers many advanced features that make it an ideal tool for kids. With Widevine L1 support, the little ones can enjoy high-quality content from platforms such as Disney+, Prime Video and YouTube. A special Google Kids Space is also available. It contains a variety of apps, games, videos and books tailored to different age groups and interests. This allows children to develop logical thinking and manual skills while having fun and learning at the same time.

2 display modes

Blackview Tab 30 Kids also takes care of children's eye health with two eye protection modes: Black-White and Night Light. Black-White mode reduces light emissions, which reduces eye fatigue during long reading sessions, while Night Light offers warm colors that are gentler on vision in low light, which supports better sleep.
