

## Pet Grooming Kit AIRROBO PG100

Pet Grooming Kit AIRROBO PG100

Ref: 6931705003987

AIRROBO PG100 vacuum cleaner/pet hair care kit.

Take care of your pet without having to leave the house. The AIRROBO PG100 pet hair grooming vacuum provides up to 12,000 Pa of suction power to effectively remove up to 99.9% of loose hair, dust mites, allergens and other contaminants. Three adjustable suction levels allow you to adjust its performance to suit your pet's different grooming needs. Maintenance of the device will not be difficult for you. It also comes with practical accessories, such as a clipper and a tool for removing undercoat.

Easy emptying and large capacity

The 2-liter dust container allows you to work for long periods without frequent emptying. The easy-to-use quick emptying system ensures hygiene and convenience - just one click to remove the collected dirt.

Convenience of use

The kit includes a detachable hose with a length of about 1.5 meters, which allows for comfortable and efficient care of even large or sensitive animals. The compact dimensions of the vacuum cleaner (326 x 166 x 226 mm) and its low weight (2 kg) make it easy to store and maneuver.

Professional grooming at home

AIRROBO offers a complete set of pet grooming tools, so you can take care of your pet's hygiene and appearance without leaving home. A dedicated combing brush gently picks up tangled hair, then automatically sucks the tangled bristles straight into a basket. An electric clipper can handle hair of varying thickness and length, while a crevice tool allows you to clean hair and dust from hard-to-reach areas such as sofas and bed crevices. The cleaning brush, on the other hand, will come in handy when removing dirt from clothes, couches, carpets, edges, as well as your pet's paws.

#### Reliable performance

The AIRROBO PG100 vacuum cleaner supports three levels of suction (4-5KPa, 7-8KPa, 10-12KPa), so you can adjust its performance to your pet's needs. A high-quality HEPA filter takes care of the purity of the blown air. Despite its high efficiency, the noise generated by the device is only 50 to 60 dB, which minimizes the risk of frightening your pet.

#### Included:

Vacuum cleaner for grooming hair
