Monitor Koorui N07 27" 3840x2160px 60Hz

Ref: 6977295250622

### Koorui N07 27" 3840x2160px 60Hz monitor

Discover a new dimension of image quality with the Koorui N07 monitor. This 27-inch screen with UHD resolution (3840 x 2160px) offers unparalleled image quality, wide viewing angles and advanced features such as HDR10 and G-sync compatibility. Whether you're a professional who cares about every graphic detail or a gaming enthusiast, the Koorui N07 monitor offers smoothness and performance that will satisfy the most sophisticated visual needs.

### The perfect picture in every detail

The Koorui N07 monitor with a 27-inch screen and UHD (3840 x 2160) resolution is a guarantee of extraordinary image quality that will meet the expectations of even the most demanding users. Thanks to IPS technology and a wide 178° viewing angle, the monitor offers vivid colors and clear images no matter where you are.

### Excellent color depth

Advanced color depth of 10 bits and coverage of 90% of the DCI-P3 gamut make this monitor an ideal choice for graphic designers or filmmakers. HDR10 technology significantly improves the dynamic range and color intensity for an even more realistic visual experience. A static contrast ratio of 1,000:1 combined with a dynamic contrast ratio of 20,000,000:1 makes blacks deep and whites pristine.

### Outstanding smoothness

The Koorui N07 offers a refresh rate of 60 Hz, ensuring smooth images without ghosting or lag, crucial in dynamic game scenes or when watching fast-moving content. Compatibility with G-sync technology further eliminates screen tearing issues, which is especially appreciated by gamers and multimedia creators.

### Universal connectors

The monitor is equipped with two HDMI 2.0 and DisplayPort 1.4 ports for easy connection to various devices and sources. An additional audio connector allows you to connect headphones or external speakers, further enhancing the monitor's functionality.

### With the user in mind

Ergonomics and user comfort have not been neglected either. The monitor has an adjustable tilt from -5° to 20°, allowing you to adjust its position to suit your individual needs. With eye protection in mind, the N07 supports technology that reduces harmful blue light emissions, ensuring comfort even during long hours of work or entertainment.

### Theater mode - cinema quality in the comfort of your home

Thanks to a special cinema mode, any movie viewed on the Koorui N07 monitor is transformed into a true cinematic experience, with colors and image detail taking the user right into the center of the action. This advanced mode refines every detail of the image, from color intensification to exceptional black clarity and depth. Increased brightness and contrast make dark scenes rich in detail, while city lights or on-screen explosions come to life with unprecedented intensity.
