Darkflash aquarius Computer Case

With the Darkflash aquarius you can create a computer that is great to play and work with. It can accommodate up to 8 fans and is equipped with several ports such as USB 3.0, USB 2.0 and HD Audio. It is made of high quality materials that make it extremely durable and easy to maintain. Transparent panels allow you to get interesting visual effects.

Style and functionality

The side panel of the case is made of solid 3mm thick acrylic glass. The front panel is also transparent, so you can get interesting visual effects with RGB devices like fans, for example. The top cover is magnetic, which makes cleaning the product much easier and protects it from dust. Moreover, the excellent quality SPCC panels have been additionally painted, which gives them a modern and stylish character.

Built-in slots and ports

The product has bays for a 330mm VGA card and for a CPU cooler with a maximum length of 160 mm, which will solve the problem of unsightly cabling. There is also an option to mount a 240mm water cooler. There is also one USB 3.0 input for fast file transfer, as well as 2 USB 2.0 inputs and an HD Audio input. The case also has an independent enclosure for the hard drive and power source.

Cooling system

The case is designed in such a way that you will avoid overheating of your PC. It is equipped with a high-quality internal cooling duct and can accommodate up to 8 fans: 3 120mm fans at the front or 240mm water cooling, one 120mm fan at the back, 2 120mm fans at the top of the case. The 2 fan slots are also located above the power supply housing for a more efficient cooling of the power supply unit and a more stable performance.
