

Mcdodo CH-2330 magnetic inductive charger

Mcdodo CH-2330 magnetic inductive charger

Ref: 6921002623308

Mcdodo CH-2330 magnetic inductive charger

The Mcdodo CH-2330 wireless charger is designed for fast and efficient charging of various mobile devices. It is made of high-quality materials such as aluminum alloy, tempered glass, magnets and nylon. Its compact size of 59.6 × 7.3 mm and weight of 55 g make it easy to use and carry.

High power and charging efficiency

The Mcdodo CH-2330 offers an output power of up to 15 watts for fast charging of devices. The device supports output voltages of 5V/3A and 9V/3A, which allows efficient charging of various smartphone models. For optimal performance, it is recommended to use the charger with a Mcdodo or Apple magnetic case, which ensures stable and fast charging.

Stability and safety

The Mcdodo CH-2330 charger is equipped with 16 strong magnets to keep your device stable while charging. Built-in LED backlighting provides real-time information about the charging process for added convenience. The charger also features advanced protection against overheating, short circuit, overcharging and electromagnetic field, which guarantees safe charging.

Performance and practicality

The Mcdodo CH-2330 features copper components that ensure excellent conductivity, efficient charging and lower power consumption. The thin 7.3mm design does not affect the use of your smartphone, allowing you to use your device comfortably while charging. It comes with a 1-meter long nylon braided cable, which is resistant to wear and tear and ensures long-lasting reliability.

Compatibility

The Mcdodo CH-2330 charger is compatible with a wide range of devices, including iPhone 14/13/12 Series, TWS handsets and smartphones from other brands such as Samsung, Huawei and Xiaomi that support wireless charging. This makes it a universal solution for charging multiple devices.
