360° Indoor WiFi Camera Botslab 2 C211 3MP

Ref: 6974772421018

360° Indoor WiFi Camera Botslab 2 C211 3MP

Botslab 2 C211 3MP rotating indoor camera

The Botslab C211 is an advanced surveillance device that captures detailed footage in high 2K resolution. With its enhanced night vision function, it provides clear images even in total darkness, without IR interference. It's ideal for monitoring children or pets, as it won't disturb their sleep at night, while guaranteeing the highest image quality at any time.

360° coverage and intelligent object tracking

The lens of the Indoor Cam 2 moves both horizontally and vertically, providing comprehensive coverage of the entire room. The intelligent tracking system is able to detect motion and automatically follow it, allowing you to record all relevant events. In addition, you can set your favorite monitoring areas, making monitoring more convenient and efficient.

Instant notifications

The camera is equipped with a notification system that immediately informs you when motion or human presence is detected. These notifications are sent directly to your smartphone, allowing you to monitor your home in real time and quickly respond to potential threats. The system also allows you to customize alerts, reducing false alarms and providing more efficient monitoring.

Remote monitoring and two-way communication

With the Botslab app, you can remotely monitor your home by viewing live video from up to 4 cameras simultaneously. This feature allows you to monitor multiple areas of your home in real time. The camera also has a two-way audio feature, which allows you to communicate with your family or pets and deter a potential burglar, even when the owner is not home.

Integration with voice assistants

The camera is compatible with Amazon Alexa and Google Assistant for easy voice control. It supports 2.4GHz Wi-Fi, ensuring a stable connection and seamless integration with smart home systems. This functionality makes home security management more intuitive and convenient.

2 ways to save recordings

The device offers flexible options for storing recordings, including on a memory card and in the Botslab cloud. This allows you to play back missed notifications and access your saved videos from anywhere.
