360° Indoor WiFi Camera Botslab 2E Pro C213 3MP

Ref: 6974772422602

360° Indoor WiFi Camera Botslab 2E Pro C213 3MP

Botslab 2E Pro C213 3MP indoor rotating camera

Keep tabs on what's happening at home in your absence. The Botslab C213 camera, offers high-quality recordings in 3MP (2304 x 1296) resolution. Equipped with a 1/2.8" CMOS sensor and a wide F2.2 aperture, it captures detailed and clear images even in low light. Thanks to the night vision function and 2 infrared LEDs (850 nm), the image is clear even in total darkness at a distance of up to 10 meters. In addition, the camera offers a lens hooding function for privacy when monitoring is not needed.

Wide range and intelligent tracking

The camera uses a wide field of view (100.6° x 81° x 43°) and the ability for full horizontal rotation (360°) and a large range of vertical movement (149.9°). Its intelligent tracking system can detect motion and automatically follow the subject, providing full room monitoring. The camera also offers a facial recognition function for more efficient and accurate monitoring.

Advanced notifications and security

The camera sends instant alerts to the phone when it detects motion or the presence of people. With customizable alerts, users can avoid false alarms and focus on important events. In addition, the camera is equipped with an audible alarm that triggers when a potential intruder is detected, increasing security.

Remote monitoring and two-way communication

With the Botslab app, available on the App Store and Google Play, users can remotely monitor their homes using live view on any device. The app allows users to view video from up to four cameras simultaneously. Two-way audio communication allows users to chat with family members, as well as deter potential burglars, even when the owner is not at home.

Various data storage options

The camera offers various data storage options. You can use local storage on a microSD card with a capacity of up to 256 GB, or the Botslab cloud. The one-year trial version of the Botslab cloud allows 7-day storage of 5-second motion-detected recordings, with 5-minute pauses between recordings. The camera also supports continuous recording and event recording for full control over recorded footage.

Convenient control

The camera integrates with Amazon Alexa and Google Assistant for easy voice control. It supports 2.4GHz Wi-Fi and a wired connection, ensuring a stable and reliable connection. In addition, the one-touch connection feature makes the camera a convenient and effective tool for home monitoring.
