Outdoor WiFi Camera Botslab W302 4MP 5G

Ref: 6974772422411

Botslab W302 4MP 5G WiFi outdoor camera

The Botslab W302 WiFi outdoor camera provides the ultimate in image quality and security. With a dual 2.5K / 4MP lens and a 170° viewing angle, you will get detailed and wide-angle recordings. Features such as person and vehicle detection, intelligent tracking, two-way audio, as well as light and sound alarms guarantee comprehensive protection for your property.

High-quality images

With 4MP QHD resolution, the Botslab W302 camera provides clear, detailed recordings. The use of True Color 24/365 technology has made it possible to guarantee color images around the clock, regardless of lighting conditions.

Wide-angle shots and intelligent tracking

Be assured that nothing important will escape your attention. With a 170° viewing angle and dual lens, the camera covers a wide monitoring area. The Dual Live Views function allows you to view panoramic and close-up shots at the same time for convenient observation and analysis of events. The Botslab W302 uses advanced AI algorithms to track the movement of people and vehicles. It also provides automatic close-ups of moving objects, making monitoring more efficient.

Two-way audio

The built-in microphone and speaker enable two-way audio communication. This allows you not only to listen to what's going on around the camera, but also to communicate with people within its range. The solution used makes it possible, among other things, to ask the courier to leave a package in the indicated place, call the children home or scare off uninvited guests from a safe distance.

Integrated alarms and privacy zones

The camera offers an audible alarm that activates when motion is detected. Along with it, a light is activated. This allows the device to effectively deter potential intruders. In addition, the function of designating privacy zones allows you to disable monitoring in specific areas.

Convenience of use

Compatibility with Amazon Alexa and Google Assistant allows you to control the camera with voice commands. The camera also offers cloud and microSD card storage options of up to 256GB for flexibility and data security.

Weather-resistant

The Botslab W302 is IP66 water and dust resistant, so it maintains high performance even in harsh weather conditions. The camera can operate flawlessly in extreme temperatures ranging from -20°C to 60°C. Its installation will not cause you any difficulties - you can mount it both on the wall and on the ceiling.
