

## Video Doorbell Botslab R801 3MP

Video Doorbell Botslab R801 3MP

Ref: 6974772421308

### Botslab R801 3MP video intercom

The Botslab R80 video intercom provides complete control and security at the doorstep of any home. With a 3MP camera, wide-angle lens (140°), PIR motion detection and night vision function, you will achieve the peace of mind you dream of. The device is equipped with a built-in 5000 mAh battery, which you can charge while in use. The Botslab R801 also offers cloud storage for up to 7 days and is compatible with Alexa and Google Assistant, and you won't have any trouble installing it.

### Exceptional image quality

The Botslab R801 offers 3MP (2304x1296) resolution, making every recorded scene clear and full of detail. The device uses PIR motion detection with a detection angle of 120° and a range of 5 meters, so it effectively detects movement in front of the door. You can check the information about the detected activity in the dedicated app. Thanks to the wide-angle lens with a field of view of 140°, you will not miss any detail. The HD Night Vision function guarantees a clear image at a range of up to about 4.5 meters even at night.

### Reliable performance

The built-in 5000 mAh battery can be charged during use using a powerbank, among other things. This ensures that your home will always be monitored, even during power outages.

#### Ease of installation and operation

Installation of the video intercom is smooth and hassle-free. It can be installed either with glue or with screws. An intuitive mobile app provides access to all the device's functions, including remote video call answering and live viewing. The Botslab R801 also works with Alexa and Google Assistant voice assistants, so you can manage its operation with voice commands.

#### Notifications and detection

With notifications, you will always know when motion is detected or when people are present in front of your home. The Botslab R80 video intercom is able to identify family members, which increases security and convenience.

#### Secure cloud storage

The ability to store recordings in the cloud provides an additional layer of protection for your data. Without a subscription, record storage of up to 24 hours is available. However, you can take advantage of Botslab Cloud Storage's one-year trial period, which offers 48 hours of storage, as well as the option to expand to 7 days.
