Smart Water Fountain for pets Petsuper PW01 1,8L (white)

Petsuper PW01 1.8L smart dog and cat water fountain/ drinker (white).

The Petsuper PW01 smart fountain/drinker is the perfect solution for any pet owner who wants to ensure their pet has constant access to fresh and clean water. With its advanced features, quiet operation and large 1.8L capacity, it will work well in almost any home where pets live.

Two operating modes to choose from

The Petsuper PW01 offers two modes of operation: continuous, which provides a constant flow of water, and intermittent, which turns on the water flow for three minutes every two minutes, which is more energy-efficient. This allows you to customize the device to suit your pet's individual needs!

Quiet operation

Thanks to the low-voltage 5V pump, the fountain operates extremely quietly, emitting a sound level of only 20 dB. This means the device won't disturb your home - this is especially important at night or in small living spaces. You don't have to worry about the waterer disturbing you or scaring your pet!

Hygiene and safety

Selected elements of the fountain are made of high-quality silicone, which has antibacterial properties. This keeps the water in the device clean and safe for your pet, minimizing the risk of infection. So you can be sure, your pet drinks only the best!

Large capacity for longer

With a capacity of 1.8 liters, the fountain will satisfy your pet's needs for about 7 days. This means you can safely go on a short vacation, confident that your pet will have constant access to fresh water.

Three-stage filtration system

The fountain is equipped with an advanced three-stage filtration system that removes contaminants such as hair, food debris and metal ions. It also eliminates unpleasant odors. The water is purified by a microporous filter, activated carbon from coconut shells and ion exchange resin, ensuring the highest quality for your pet.

Safety first

The Petsuper PW01 has an automatic shut-off function in case of water shortage, which prevents overheating and damage to the device. In addition, liquid level and filter replacement indicators help keep the device in optimal condition, ensuring long and trouble-free operation. The fountain is also very easy to clean.
