Ref: 6975447710291

Smart Water Fountain for pets Petsuper PW02 2,5L (white)

Petsuper PW02 2.5L smart dog and cat fountain/drinker (white).

The Petsuper PW02 smart fountain/waterer is a state-of-the-art 2.5L device designed with your pet's health and comfort in mind. Thanks to advanced filtration and functional solutions, it provides constant access to fresh and clean water, encouraging pets to drink regularly. At the same time, it works extremely quietly - it will not disturb your peace and quiet.

Easy to monitor water level

The transparent reservoir makes it easy to monitor the water level, allowing you to check in real time whether your pet has access to water. All you have to do is take a glance! What's more, when the amount of liquid drops below a certain level, the device will automatically shut off to prevent possible damage.

Large capacity for a long time

The fountain with a capacity of 2.5 liters will meet the needs of a cat or small dog for about 7-10 days. This means you can take a short vacation with peace of mind, knowing that your pet will have constant access to fresh water.

Simple operation and cleaning

The Petsuper PW02 fountain is very easy to disassemble, which makes it much easier to clean. All elements of the tank can be quickly

and efficiently disassembled and cleaned, which reduces the risk of bacteria multiplication. This way you will provide your pet with healthy water every day! What's more, there are non-slip pads on the bottom of the fountain to prevent it from sliding on the floor.

Energy-saving power supply

The fountain is powered by USB, which not only saves energy, but is also more environmentally friendly. Low power consumption makes the device economical to use, while providing high performance.

Quiet operation for a quiet home

The drinker uses a low-voltage 5V pump that sets the water in motion without generating much noise. As a result, the device works extremely quietly - don't worry about disturbing your peace or stressing your pet.

Reliable filtration

An additional advantage of the fountain is the advanced filtration system, which effectively eliminates hair, food residues, heavy metals and other harmful particles. This way you can be sure that your pet drinks only fresh, clean and safe water.
