

## Smart Water Fountain for pets Petsuper PW03 2,5L (white)

Ref: 6975447710284

Smart Water Fountain for pets Petsuper PW03 2,5L (white)

Petsuper PW03 2.5L smart dog and cat fountain/drinker (white).

The Petsuper PW03 fountain is an innovative device designed for the health and well-being of your pet. With a capacity of 2.5 liters, it provides constant access to fresh water for a long time, supporting regular hydration of pets. At the same time, the device is very easy to clean and works extremely quietly.

**Easy control of the water level**

The transparent tank with a clear scale allows you to check the water level quickly and easily. This way you always know when it needs to be refilled so that your pet has constant access to it. All it takes is a glance!

**Effective filtration system**

The Petsuper PW03 uses an advanced three-stage filtration system that effectively removes contaminants such as hair, food debris, heavy metals and chlorine. It also effectively removes unpleasant odors. Thanks to activated carbon and ion exchange resin filters, the water remains fresh and healthy, taking care of your pet's health.

**Quiet and safe operation**

The fountain operates extremely quietly, emitting sound at only 30 dB, so it won't disturb your peace and quiet. Don't worry that it will

disturb your night's rest or startle your pet! In addition, the built-in water level sensor means that when there is not enough water in the tank, the device automatically shuts off. This solution protects the drinker from damage and extends its life.

#### Convenience and safety

A cordless pump and separation of water and electrical components increase the safety of use. This technology eliminates the risk of leaks and ensures comfortable, trouble-free use of the drinker on a daily basis. What's more, non-slip pads prevent the fountain from sliding on the floor, and the strong, durable nylon braided cable is resistant to various types of damage.

#### Easy cleaning

The fountain is extremely easy to disassemble, which makes it possible to quickly and thoroughly clean all its components. This makes keeping the device clean extremely easy, which translates into the health of your pet.
