Smart food dispenser with camera Petsuper PF01-2 WiFi 5L (white)

Ref: 6975447710024

Petsuper PF01-2 WiFi 5L smart food dispenser with camera (white).

The Petsuper PF01-2 smart food dispenser with 5L capacity facilitates the daily care of your pet. From the mobile app, you can remotely control food portions, set meal schedules and monitor the device's status. Support for 2.4G and 5G WiFi connectivity ensures a stable connection. The device offers a voice message recording function, which further facilitates interaction with your pet. You will also have at your disposal a 1080P HD camera with a 150° wide-angle lens, night vision and motion detection function to make sure your four-legged friend is safe.

HD camera with motion detection function

The Petsuper PF01-2 smart food dispenser is equipped with a 1080P HD camera that provides a clear and detailed image of your pet at any time of the day or night thanks to its night vision function. The 150° wide-angle lens allows you to monitor a larger area for better control of your pet's surroundings. In addition, when motion is detected, you will receive a notification on your mobile device.

Remote control and voice messages

With the mobile app, you can enjoy full control over your pet's feeding, no matter where you are. It is possible to set up to 6 meals per day and adjust the portion size to suit your pet's individual needs. The app allows you to add meals, view notifications about the remaining level of food, manage your pet's information and record a 10-second voice message that will play during feeding. With this

solution, the pet will be called for a meal, hearing a familiar voice.

Anti-clogging system

The innovative system guarantees smooth feeding of different types of food - from dry to freeze-dried to mixed forms. A special design with wide openings and a soft mixing mechanism prevents jamming. So you can be sure that your pet will always get its meal on time.

Dual power supply

Your pet's safety is a priority, so you can power the Petsuper PF01-2 in two ways - mains and battery (3 D batteries, not included). This way, even in the event of a power outage, the device will continue working without interruption.

Always fresh food

Thanks to multi-layered freshness protection, including a silicone seal, a moisture-absorbing pouch and a sealed grain outlet, the food in the dispenser remains dry and fresh for a long time. The airtight seal keeps out air and moisture, which is essential for preserving food quality.

Easy to clean

Petsuper PF01-2 is designed for ease of cleaning. The modular design allows quick disassembly of individual components, which can be washed by hand or in the dishwasher. The solution used makes it easy to maintain hygiene and ensures simple maintenance of the device.
