Electric swimming board ASIWO MAKO (green)

Ref: 0652726572257

ASIWO MAKO Electric Swimboard (green).

Ensure even more fun on your next trip to the pool or beach. The ASIWO MAKO electric swimming board will provide you with fantastic entertainment and allow you to enjoy a dynamic ride in the water. It stands out for its excellent buoyancy and maximum speed up to about 1.5 m/s. It also allows you to choose from 3 speed levels and is easy to operate, with a run time of up to 60 minutes. It also features a lightweight, handy design - transporting it won't be a problem for you.

For small and large

MAKO electric board is perfect for users of almost any age - both adults and children. It has a fully enclosed drive system and rounded edges, making it safe to use. What's more, the automatic shut-off mechanism stops the drive if you accidentally let go of the device, giving you confidence that it won't float away from you. All this means that the MAKO board can be the perfect equipment for the whole family!

Lightweight, portable design

Do not be afraid of problems with transporting the board. The device weighs only 2.6 kg, and its dimensions are about 487 x 380 x 155 mm. This makes it easy to take it with you wherever you want - for example, to the beach, the lake or the pool.

Working time of up to 60 minutes

With MAKO the fun won't end too quickly. The board is equipped with a powerful 2.5 Ah battery, which allows you to use it for up to 60 minutes on a single charge. What's more, you only need about 3-4 hours to charge the device. So you can continue your water adventures in a relatively short time!

3 speed levels to choose from

Adjust the operation of the board to your needs. ASIWO MAKO offers 3 speed levels to choose from - about 0.6 m/s, 1 m/s and 1.5 m/s. This makes it ideal for users with different levels of experience! When learning to swim, the lowest speed will work great, and if you want to skip through the water and feel the wind in your hair, choose the highest one!

Easy operation

Operating the board will also not cause you any problem. Simply lean your chest against it, then press and hold the buttons on either side to launch. Want to stop? Just release any button and the board will stop moving.

Attention to detail

The board features excellent buoyancy, so you can float without any problems. This means that it will also be great for learning to swim! In addition, the device is equipped with a high-end drive system with up to 300 watts of power, which translates into efficient, reliable performance.
