Tempered glass for Samsung S24 Ultra Torras Install Master

Tempered glass for Samsung S24 Ultra Torras Install Master

The Torras Install Master tempered glass was designed specifically for the Samsung S24 Ultra. With a hardness of 9H+, the accessory keeps the device safe even in the most extreme conditions. In addition, it reduces harmful blue light, supporting eye health. Installation is seamless and takes just a second.

Drop resistance

The Torras accessory has been tested to withstand drops from a height of approximately 2.44 meters. The military-grade protection technology ensures that your phone is protected even in the toughest situations. So you can enjoy using your smartphone without worrying about its safety.

9H+ hardness

The high hardness of Torras Install Master tempered glass provides protection against scratches and mechanical damage. Even sharp objects, such as keys or knives, are unable to damage the surface of the accessory. As a result, your smartphone's screen will always look like new.

Hassle-free operation of your device

Thanks to nano-conduction technology, Torras Install Master glass provides high touch sensitivity. Fast signal transmission makes fingerprint recognition work just as well as on the original screen. Enjoy smooth and hassle-free use of your smartphone.

Easy and fast installation

The innovative auto-installation system makes installing the Torras Install Master glass easy. With just one click, you can precisely mount the accessory on your smartphone screen. A special coating prevents air bubbles, ensuring a perfect fit and aesthetically pleasing appearance.

Protection against fingerprints

Torras Install Master glass is equipped with a special coating that prevents fingerprints and smudging. As a result, the device's screen will always look clean and aesthetically pleasing. In addition, the surface of the glass is extremely smooth and allows comfortable use of the device.

Eye protection

The Torras product has been certified by TÜV Rheinland for its ability to reduce harmful blue light. As a result, the eyes are less prone to fatigue and discomfort during prolonged use of the smartphone.
