Ref: 5906168438295

Uperfect Portable Monitor UStation Delta 15,6" 1920x1080 60Hz

Uperfect UStation Delta 15.6" 1920x1080 60Hz portable monitor

The Uperfect Delta is designed for maximum functionality and convenience. With a 15.6" diagonal and Full HD (1920 x 1080) resolution, each screen offers a clear and detailed image. It allows you to efficiently manage multiple tasks at the same time, increasing productivity and comfort. With the Delta's multi-screen capability, it allows you to expand your workspace or fold your screens to conveniently share content with colleagues.

Ergonomic and versatile design

The Uperfect Delta uses dual screens whose position can be adjusted to reduce eye and neck discomfort and fatigue. The collapsible design allows the screens to be positioned at different angles, which is ideal for presentations, online meetings or performing several tasks simultaneously. The two screens can operate together or independently, allowing you to use your workspace more flexibly and efficiently. This allows you to concentrate fully on your work, minimizing the time you spend scrolling and switching between windows.

Unparalleled image quality

IPS monitors provide a wide viewing angle of up to 178°, which means the image remains clear and colorful, even when you look at the screen from an angle. Vibrant colors thanks to 100% coverage of the sRGB gamut make every detail visible. The 1,000:1 contrast ratio and 300 cd/m² brightness guarantee a clear and sharp image, regardless of lighting conditions. HDR technology further enhances color

reproduction, which is ideal for demanding tasks such as video and photo editing.

Easy connectivity and compatibility

The Delta monitor is equipped with 2 USB-C ports (audio and video) and 2 mini HDMI ports, allowing it to connect to various devices without the need to install drivers. It works great with laptops, computers, tablets, smartphones, Playstation, Xbox, Nintendo Switch and SteamDeck. The monitor is compatible with Windows, Mac, Chrome, iOS and Android operating systems, and the ability to connect 2 devices to the monitors at the same time means you can work on independent screens for greater efficiency and flexibility in your work.

For creative creatives

Uperfect Delta is ideal for designers and professionals who need more screen space. Two screens increase your workspace, allowing you to manage tasks, video editing, CAD design and data analysis more efficiently. In creative work, the extra screen space enables better organization of activities, leading to increased productivity and creativity.

Eye protection and built-in speakers

Uperfect Delta offers Ucare technology that reduces blue light emissions by more than 80%, reducing eye fatigue. The flicker-free design makes the monitor safe for your eyes even during prolonged use. Built-in 1W speakers provide a 3D surround sound source, offering an immersive audio experience, perfect for watching movies, gaming and conducting online meetings.
